

KENSHIN A. OGMER

Santolan, Pasig City | kenshinaogmer@gmail.com | 0967 132 8737 | github.com/OgmerKenshin

SUMMARY

Second-year Computer Engineering student at PUP with hands-on experience across full-stack web development, game development, and AI tools. Built and shipped several independent projects while running a freelance e-commerce business. Seeking an OJT/internship to bring these skills to a real engineering team.

EDUCATION

Polytechnic University of the Philippines

Manila, Philippines

Bachelor of Science in Computer Engineering | Expected Graduation: 2028

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Programming Languages & Design, Computer Hardware Fundamentals, Operating Systems

Meralco Foundation Institute

Pasig City, Philippines

STEM Strand, Senior High School | Graduated 2024

PROJECTS

PUP Chika — Student Review Platform

HTML, CSS, JavaScript, Spring Boot, Java, SQL

- Built a full-stack web app that lets PUP students post and browse honest reviews of events, courses, and professors
- Designed the SQL database schema and built REST APIs in Java Spring Boot for review submission and retrieval

Sakay Global — Transport Booking Platform

PHP, Python, SQL, HTML, CSS

- Developed the front-end interface for a ride-booking platform using HTML and CSS
- Built backend logic in Python to calculate dynamic fares in real time from distance and traffic data
- Built account service logic using PHP for accounts and passwords

PUP Doom-Slayer — Campus-Themed FPS Game

Python

- Built a Doom-inspired first-person shooter set on a custom level modeled after PUP's Engineering campus
- Implemented core gameplay systems, including player movement, combat, and enemy encounters

Castle Clashers — Multiplayer PvP Game

Roblox Studio, Lua

- Designed, scripted, and published a fully playable 3D player-vs-player combat game on Roblox
- Implemented core combat mechanics and game logic using Lua

Jarvis — AI Voice Assistant

Python, OpenAI API

- Built a Python-based voice assistant that uses OpenAI's language model to interpret voice commands
- Integrated natural language processing to execute tasks and respond to queries in real time

EXPERIENCE

Freelance Online Sales Associate — Self-Employed

Oct 2024 – Present

- Marketed and sold PC parts and music equipment across online marketplaces with detailed, spec-driven listings
- Managed customer inquiries, negotiated pricing, and coordinated timely delivery to maintain buyer satisfaction
- Tracked inventory and sales performance to guide purchasing and pricing decisions

SKILLS

Languages: Python, Java, JavaScript, SQL, Lua, HTML, CSS

Frameworks & Tools: Spring Boot, Node.js, Roblox Studio, Git & GitHub, Maven

Focus Areas: Full-Stack Web Development, Game Development, AI & Automation
